

Bore Cleaner

FEATURES:

Safe and affordable, Bore Cleaner is the efficient way to remove iron deposits, sludge and grime from pumps, pipes and bores.

APPLICATIONS:

Bore Cleaner is easy to use and be utilized in many different applications, including;

Soak Tank

- Make up a 10% solution (1kg Bore Cleaner per 10L of water).
- Soak articles for 30-48 hours depending on severity of cleaning required.
- Wash items thoroughly with water before use.
- **Tip:** Using hot water and regularly mixing the solution will dramatically improve cleaning results.

Pipes

- Make up a solution between 5-10% depending on severity of cleaning required.
- Fill pipes with required quantity and leave solution to soak for 24-72 hours.
- Flush thoroughly with water.

To calculate quantity of bore cleaner solution required, pipe volumes per 100m of length are:

20mm – 31 litres
25mm – 49 litres
32mm – 80 litres
38mm – 113 litres
50mm – 196 litres

Tip: Using a high pressure and high flow rate will drastically improve flushing.

Bores

- Disconnect the bore supply from your water supply to prevent contamination.
- Gauge what size and how deep your bore is.
- Add a 5-10% solution depending on severity of cleaning required.

Solution Strength	Bore Size		
	100mm	150mm	200mm
5% per 10m of depth	4kg	9kg	16kg
10% per 10m of depth	8kg	18kg	32kg

- Pour the calculated quantity of bore cleaner crystals down the bore slowly.
- Switch the pump on and recycle bore water for 15-30 minutes.
- Allow to soak for 6-24 hours, repeating the recycle process several times.
- When finished, pump to waste until water is clear and no bore cleaner is present.

NOTE: Please follow precautions detailed on the label and SDS.

Please do not dispose of Bore Cleaner buckets - instead rinse thoroughly, remove the label and reuse as a sturdy bucket. Otherwise HamChem will dispose of empty HamChem containers for free.

PACK SIZES:

Bore Cleaner is available in 5kg, 10kg and 20kg pails, for home or commercial use.
