

Pool Treat

DANGER
KEEP OUT OF REACH OF CHILDREN
READ LABEL BEFORE USE

GRANULAR

For prevention of algae and harmful bacteria in swimming pools

ACTIVE CHLORINE 77

2 Steps to a Perfect Pool

Step 1.

Test Pool Chlorine (best each night)

CHLORINE READING	6	HIGH	High level of chlorine may irritate the eyes and bleach some swimming apparel.	ACTION TO TAKE	No Pool-Treat required
	5				
	4	O.K.	O.K. level is fine to swim in. Ideal for commercial pools.		Decrease Pool-Treat dosage
	2				
	1.5	IDEAL	Ideal level of chlorine combined with filtration for sparkling water will provide hygienic, trouble free swimming pool water.		Continue the same Pool-Treat dosage
	0.5				
	0	LOW	Low levels of chlorine will produce cloudy water and harmful infectious bacteria may be present.		SHOCK DOSE

Step 2.

Add **GRANULAR CHLORINE**

DIRECTIONS: Read the DANGER warning instructions and follow handling instructions.

Pre-dissolve Pool Treat Granular in a plastic bucket of water and distribute evenly over the pool or into the pool skimmer with filter pump operating. Note: Do not swim in the pool until the Pool Treat Granular has fully mixed and an ideal level of chlorine is measured. (15 to 30 minutes of filter pump operation)

Daily Treatment Guide

Litres = gallons x 4.5

SHOCK DOSE !

Twice the
Daily Treatment
